

Lafayette Consolidated Government **Environmental** Quality Division has **Environmental** Educators available to you to present information on recycling, litter abatement and storm water pollution prevention to your school, class, group or organization.

Presentations include:

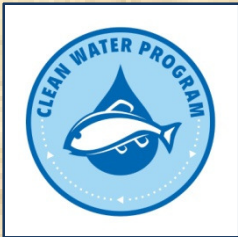

Recycling

- Beginning of recycling in the United States and Lafayette
- Information on products that are recycled in Lafayette Parish
- **Environmental** impact of recycling
- Reasons why every household should recycle
- Monetary impact of recycling

Litter

- Sources of litter
- Types of litter
- **Environmental** impact of litter
- Alternative ideas to help stop litter
- Opportunities to help keep Lafayette Clean

Water Quality

- What is a watershed?
- Which watershed do we live in?
- Enviroscape Watershed Model
- **Environmental** impact of surface water pollution
- Surface water vs. drinking water
- Types of surface water pollution
- Prevention and restoration methods

Looking for a group service project?

Ask about our **STORM DRAIN MARKING** and **ADOPT-A-ROAD** programs!

Take a tour!

- Compost Facility
 - How compost is made from leaves and grass clippings
 - Overall composting process
- Closed N. Dugas Landfill
 - Anatomy of a landfill
 - Restoration of native Cajun prairie plants
 - Wildlife habitat
- Recycling Foundation
 - See how your recyclables are processed

Please contact the Lafayette Consolidated Government **Environmental** Quality Division at (337) 291-5637 for **Recycling** presentations and 291-8529 for **Water Quality** presentations.
